Extensively revised and updated for its third edition, this manual is written for students to use during rotations in PharmD programs.

It provides a unique reference source for the introductory clerkship and is the only clinical clerkship manual designed specifically for pharmacy students.

This manual eases the transition from classroom to experiential training and provides quick reference material needed for day-to-day clinical work. It helps students move from dispensing medications to establishing relationships with patients, and improves the student’s understanding of pharmacotherapeutics in a patient-centered setting. Numerous boxes, drawings, and tables help illustrate information about drugs, procedures, and equipment.

Publication Year  2009
Edition  3rd
