This second volume of Master Techniques in Otolaryngology focuses on the procedures used in Thyroid, Parathyroid, Salivary Glands, Sinonasal Cancer, Nasopharyngeal Cancer.

With contributions from the world’s leading experts, this book is a true how-to guide to the common and advanced procedures in the major subspecialties of Otolaryngologic Surgery.

Step-by-step instructions and over 250 full-color intraoperative photographs and line drawings makes this guide an excellent quick reference for Head and Neck specialists and General Otolaryngologists alike.

In this volume:
- Each procedure follows the series format and scope for clear step-by-step instruction to each technique
- Written by experts in the field from around the world
- Covers both common and advanced procedures
- Over 250 full-color photographs and drawings
