Head and Neck Surgery

A comprehensive textbook that provides detailed information on the latest epidemiology, diagnostics, nutritional support, and emerging technology and therapeutics used to treat head and neck cancer. It will serve as a reference guide for physicians and non-physicians who diagnose, treat, and rehabilitate patients with head and neck tumors.

Key features:
- Multidisciplinary care of patients with tumors of the head and neck region
- Intraoperative navigation and robotic surgery for head and neck neoplasms
- Endoscopic approaches to the anterior skull base
- Image guidance for sinus tumors
- Minimally invasive techniques in head and neck surgery

The contributors to this volume are internationally recognized experts in head and neck surgery, plastic surgery, and oral and maxillofacial surgery, informing the book with a wealth of knowledge in these disciplines.
