Features the breast, endocrine, and oncologic surgery content from Operative Techniques in Surgery, the comprehensive 2-volume set edited by Michael W. Mulholland.

Ideal for practitioners who wish to focus on mastering today’s best breast, endocrine, and oncologic surgery procedures, it guides you step-by-step through each technique in a consistent manner, using concise, bulleted text, full-color illustrations, and full-color intraoperative photographs to clearly convey exactly what to look for and how to proceed.

- Master the full range of essential procedures with comprehensive coverage of breast surgery, breast reconstruction, melanoma surgery, surgery of the thyroid, parathyroid, and adrenal glands, and much more.
- Select the best open or minimally invasive approach for each patient with balanced coverage of the available options.
- Gain rich, complete grasp of key nuances of technique by viewing photographs and medical illustrations side by side.
- Review intraoperative considerations for each procedure before making your way through the technique.
