Master Techniques in Otolaryngology - Head and Neck Surgery: Rhinology

This book appeals to both the specialist and the generalist by presenting over 40 common and advanced procedures in rhinology (sinus/anterior skull base disorders). This volume covers not only endoscopic sinus surgery, but also the open sinus surgery techniques and also techniques for the removal of neoplasms, trans nasal orbital.

Key features:
- Written by "Masters" in the field
- Each chapter follows a tightly designed format with a focus on "how to do it"
- Includes step-by-step instructions for each procedure
- Each technique is extensively supplemented with over 1000 color intraoperative photographs and line drawings
- Applies the numerous advances in the field – imaging techniques, endoscopic instruments, basic research on mechanisms of sinusitis, understanding of sinus disorders, and new surgical techniques
