Vascular Lesions of the Head and Neck

Provides readers with an up-to-date review of the pathology, basic science, classification, radiologic features, and treatment modalities for vascular lesions of the head and neck.

This book is an excellent reference for all otolaryngologists, plastic surgeons, vascular interventional radiologists, pediatricians, dermatologists, pathologists, and general pediatric surgeons involved in the treatment of patients with vascular lesions of the head and neck.

It covers all recent developments in medical and surgical treatment, laser technology, endovascular techniques, and appropriate radiation protocols that dramatically affect the evaluation and management of patients with vascular lesions.

Key features:
- Written by leading experts on the diagnosis and treatment of vascular lesions in the fields of otolaryngology, plastic surgery, radiology, dermatology, pathology, and pediatrics
- Emphasizes a multidisciplinary approach to the diagnosis and treatment of vascular lesions
- More than 200 full-color illustrations help clarify information in the text
