Controversies in Neurosurgery II

Reflects real-world situations where multiple treatment options are often considered for difficult neurosurgical cases.

Key features:
- Experts from all over the world offer their opinions on more than 20 controversial hot topics in neurosurgery, including a discussion about whether transcranial or endoscopic approaches are the better option for resecting colloid cysts and a lively debate about the optimal treatment of giant ophthalmic artery aneurysms
- All treatment options are presented concisely in one volume, so that neurosurgeons don't have to spend time consulting other sources
- The moderators' conclusion at the end of each chapter explains the scientific evidence about the case and synthesizes the views presented

This book is ideal for neurosurgeons and neurosurgery residents, as well as neurologists and neuroradiologists.
