Ethical Decision Making in Dentistry

This concise volume covers ethics issues in the education of dentists, in licensure and licensing examinations, in solo and group private practice, and in esthetic dentistry.

It also supplies a chapter presenting the patient’s perspective on medical ethics, one on informed consent, and another on the process of developing the guidelines for ethical dental decision-making. The topics of billing, office management, and advertising are covered, and the book closes with a chapter entitled Ethics in Transition, which charts transitions in a dentist’s practice and career as well as transitions in how ethical principles themselves are viewed.
