

Ovid®

Emergency and Trauma Radiology: A Teaching File

Rely on Ovid as the trusted solution that transforms research into results

An exceptional resource for radiology trainees and practicing radiologists who are interested in reviewing the basics of this diverse and challenging field.

300 cases are portrayed through high-quality images similar to those you see in daily practice. Each emergency or trauma case includes images, along with descriptions of clinical history, findings, differential diagnosis, a discussion of diagnosis, relevant questions with appropriate answers, reporting requirements, and key information to relay to the treating physician. It's an ideal review tool both for practicing clinicians as well as those studying for board and certification exams.

Key features:

- More than 300 cases help you make accurate and informed diagnoses and study for exams.
- Actual cases have been taken from extensive teaching files in major medical centers.
- Each case is presented as an unknown, and in random order, for a close approximation to daily decision-making.
- Cases follow the same consistent format: a brief clinical history, several images, relevant findings, differential diagnosis, and final diagnosis, followed by a discussion of the case.
- Realistic case discussions mimic those between residents and faculty members in all radiology departments.

Publication Year	2016
Edition	1st Ed.
Author/Editor	Nissman, Daniel B.
Publisher	Lippincott Williams & Wilkins (LWW)
ISBN	978-1-469-89948-0
Doody's Star Rating®	★★★★★ Score: 92
