This practical primer takes you from learning to applying – by creating a visually rich, interactive experience.

All eye care providers should be proficient in evaluating the optic nerve for glaucoma in their patients. This book gives you the practice you need to make sure your abilities are up to speed.

- Briefly review key principles/pearls for evaluating the optic nerve in glaucoma with a quick summary at the beginning of each section.
- Study full-color clinical photographs demonstrating the appearance of a full range of optic nerve findings.
- Practice your recognition skills by drawing your own discograms depicting the key features and pathologic findings related to glaucoma.
