Provides a framework to better understand information overload and the various factors and contexts that influence its effect on care providers, patients and families.

The book includes several case studies designed to help you apply the framework, as well as tips and tools to reference as you embrace the opportunity to change how you handle overload!

It brings you to a better understanding of the numerous factors that influence nurses’ interpretation of the information and cues they deal with every day in practice.

Relevant to all levels of nurses practicing in health care organizations and academic institutions, the book is structured so that you can weave in and out of chapters relevant to your particular area of interest.
