Focuses on the diagnosis and management of pediatric disorders that can present while you are on call.

Editor John G. Birch and a team of exceptional pediatric orthopaedic surgeons deliver insights on a selection of pediatric problems that are common but that you may not often see.

Published cooperatively with the Pediatric Orthopaedic Society of North America, this is an excellent resource for general orthopaedic surgeons confronted with the diagnosis and treatment of pediatric disorders that they may not frequently treat. Topics covered include: Hip, Congenital Clubfoot, Trauma, Infection, Spinal Deformity, Cervical Spine, and Tumors.
