Today’s developments will change tomorrow’s standards of care. **Fast Facts: Non-Small-Cell Lung Cancer** is important reading for all health professionals and medical trainees working in this fast-moving area.

Rapid developments in the classification, screening, and treatment of non-small-cell lung cancer (NSCLC) are improving outcomes for patients with the disease. This insightful guide is designed to bring you up to speed with recent advances, including: the latest CT-based screening and interval growth imaging techniques, proposed changes to the TNM classification system, the increasing trend for minimally invasive and lung-sparing surgeries, stereotactic radiation for early-stage tumors, new targeted therapies, breakthroughs in personalized medicine.
