Fast Facts: Non-Small-Cell Lung Cancer

Today's developments will change tomorrow's standards of care. Fast Facts: Non-Small-Cell Lung Cancer is important reading for all health professionals and medical trainees working in this fast-moving area.

Rapid developments in the classification, screening, and treatment of non-small-cell lung cancer (NSCLC) are improving outcomes for patients with the disease. This insightful guide is designed to bring you up to speed with recent advances, including: the latest CT-based screening and interval growth imaging techniques; proposed changes to the TNM classification system; the increasing trend for minimally invasive and lung-sparing surgery; stereotactic radiation for early-stage tumors; new targeted therapies; breakthroughs in personalized medicine.
