This updated Oculoplastics volume features brand-new images and new information on MRI use!

Developed at Philadelphia’s world-renowned Wills Eye Hospital, the Color Atlas and Synopsis of Clinical Ophthalmology series covers the most clinically relevant aspects of ophthalmology in a highly visual, easy-to-use format. Vibrant, full-color photos and a consistent outline structure present a succinct, high-yield approach to the seven topics covered by this popular series: Cornea, Retina, Glaucoma, Oculoplastics, Neuro-Ophthalmology, Pediatrics, and Uveitis. This in-depth, focused approach makes each volume an excellent companion to the larger Wills Eye Manual as well as a practical stand-alone reference for students, residents, and practitioners in every area of ophthalmology.

Key Features:
- Authoritative guidelines for the differential diagnosis and treatment of the full range of oculoplastic conditions, ideal for practicing ophthalmologists, oculoplastics specialists, and residents.
- New coverage of the use of MRI in diagnosing conditions and determining treatment plans.
- More than 300 high-quality images – many brand-new to this edition – aid in visual diagnosis and treatment planning.
- An easy-to-use format that covers Epidemiology and Etiology, History, Physical Examination, Differential Diagnosis, Laboratory and Special Examinations, Diagnosis, Prognosis, and Management.
