Developed at Philadelphia’s world-renowned Wills Eye Hospital, the Color Atlas and Synopsis of Clinical Ophthalmology series covers the most clinically relevant aspects of ophthalmology in a highly visual, easy-to-use format.

Vibrant, full-color photos and a consistent outline structure present a succinct, high-yield approach to the seven topics covered by this popular series: Cornea, Retina, Glaucoma, Oculoplastics, Neuro-Ophthalmology, Pediatrics, and Uveitis. This in-depth, focused approach makes each volume an excellent companion to the larger Wills Eye Manual as well as a practical stand-alone reference for students, residents, and practitioners in every area of ophthalmology.

**The updated Uveitis volume includes:**
- Authoritative information on all the major aspects of ocular inflammatory disease, including both ocular and systemic manifestations of each disorder, ideal for busy practicing ophthalmologists, ocular immunologists, residents, and rheumatologists.
- More examples and variations of disease, clinical illustrations using new imaging modalities, and expanded treatment options.
- Newly characterized conditions, such as uveitis due to Ebola virus and Zika virus.
- More than 450 new and updated high-quality illustrations that detail the clinical features of each disorder, illustrate pathogenesis, and assist in visual diagnosis.
- An easy-to-use format that covers Epidemiology and Etiology, History, Physical Examination, Differential Diagnosis, Laboratory and Special Examinations, Diagnosis, Prognosis, and Management.

**Publication Year:** 2018  
**Edition:** 2nd Ed.  
**Author/Editor:** Garg, Sunir J.  
**Publisher:** Lippincott Williams & Wilkins (LWW)  
**ISBN:** 978-1-496-36300-8  
**Doody's Star Rating®:** ★★★ Score: 86  
**Platform:** Ovid  
**Product Type:** Book  
**Speciality:** Ophthalmology  
**Language:** English  
**Pages:** 522  
**Illustrations:** 0
