
The updated text reflects cutting-edge discussion on spine injury management in a neurocritical care setting. Contributions from top experts in neurosurgery, orthopaedic surgery, neurology, critical care, cardiac and pulmonary care, and trauma surgery infuse this book with a well-rounded perspective. From the pre-hospital to intensive care setting, this unique reference provides a comprehensive, yet concise approach to the treatment of acute spinal cord injury and management of patients with chronic SCI. Chapters new to this edition include neurological assessment of spinal injury, clearing the cervical spine, management of concurrent TBI and spinal injury, blood pressure and oxygen management, temperature management, fluids and osmotherapy, pharmacology, autonomic dysreflexia, infection after SCI, and emerging therapies.

Key Highlights
- Evaluation and management of SCI in the athlete including different injury syndromes and the latest recommendations for "return to play" in less severe cases
- Management of pediatric spinal injuries in the NICU with illustrative cases
- Specialized topics include a comprehensive review of SCI pharmacology, recent medical advances, socioeconomic and quality-of-life considerations
- Nearly 100 high quality illustrations facilitate understanding of complex anatomy and techniques
- Summary tables provide a handy overview of injury type, causes, characteristics, and recommended imaging modalities
- The definitive guide on the management of cervical, cervicothoracic, and thoracolumbar injuries, this is essential reading for neurosurgeons, orthopaedic surgeons, trauma and emergency specialists, and residents in these specialties.

Paired with Neurotrauma and Critical Care of the Brain, 2nd edition, this dynamic duo is the most up-to-date neurocritical care reference available today.

Publication Year: 2018
Edition: 2nd Ed.
