This book is an essential authoritative guide for plastic surgeons interested in making perforator flap reconstruction part of their practice.

**Perforator Flaps for Breast Reconstruction**
gives plastic surgeons the detailed instructions they need to perform these sophisticated breast reconstruction procedures.

Key Features:
- Written by expert surgeons who have perfected the use of perforator flaps in breast reconstruction procedures
- Detailed instructions on how to perform DIEP, SIEA, SHaEP, PAP, GAP, LAP, and TDAP flap procedures
- Radiographic images, intraoperative photos, and carefully prepared illustrations walk the reader through each procedure
