Remains your authoritative source for comprehensive coverage of those skin diseases in which histopathology plays an important role in diagnosis. This edition maintains the proven, clinicopathologic classification of cutaneous disease while incorporating a “primer” on pattern-algorithm diagnosis. More than 1,800 full-color illustrations, including photomicrographs and clinical photographs, help you visualize and make the most of the clinical diagnostic process.

Key features:
- New Clinical Summaries for most disease entities provide a concise clinical review before presenting histologic features.
- New Principles of Management section summarizes today’s complex treatment modalities in one convenient place.
- Ultrastructural, immunohistochemical, and molecular techniques are discussed where they have value in identifying particular diseases.
- Updated chapter dedicated to algorithmic classification of skin diseases according to histologic pattern features helps you develop a differential diagnosis for unknown cases.
