In Matter of Mind a renowned neurologist recounts his experiences seeing patients with behavioral deficits caused by brain disease and injuries, and explains what they have taught him about brain function and dysfunction.

Matter of Mind assumes no knowledge of neurology or neuroscience and is intended for anybody interested in brain-behavior relationships, particularly neurological patients and their families. It will also be of interest to neuropsychologists, neurologists, neuroscientists, psychologists, physiatrists, speech pathologists, and occupational and physical therapists.
