The updated Second Edition of this atlas is the definitive pictorial guide to
differential diagnosis and treatment of virtually every presenting condition seen in
ophthalmologic practice. Specialists from the prestigious Wills Eye Hospital share
their expertise in diagnosing and treating congenital and acquired disorders
affecting the internal and external structures of the eye. The superb collection of
1,422 illustrations—1,217 in full color—includes sonograms, radiographs, clinical
photographs, photomicrographs, and anatomic drawings. This edition features
more information on stem cell and genetic research, more radiographic images
and explanations of those findings, and descriptions of current methods of laser
surgery.
