Walsh & Hoyt's Clinical Neuro-Ophthalmology

The classic work in three volumes

Thoroughly revised and updated for its Sixth Edition, this classic work is the most comprehensive reference on diagnosis and treatment of neuro-ophthalmologic diseases. This edition has two new editors—Valérie Biousse, MD and John B. Kerrison, MD—and has been streamlined from five volumes into three tightly edited volumes with a sharper focus on patient management. Coverage includes major updates on genetics of diseases, new diagnostic techniques, and the newest treatment options.

Volume 1 covers the visual sensory system, the autonomic nervous system, the ocular motor system, the eyelid, facial pain and headache, and nonorganic disease. Volume 2 covers tumors, the phacomatoses, and vascular disease. Volume 3 covers degenerative, metabolic, infectious, inflammatory, and demyelinating diseases.
