Comprehensive, practical guide to diagnosis and treatment of sports-related injuries.

Covers all the material required for the American Board of Orthopaedic Surgery's new Subspecialty Certificate in Sports Medicine examination. Emphasis is on detailed, step-by-step descriptions of surgical techniques for treating sports-related injuries, including the latest arthroscopic procedures. These techniques are illustrated with over 800 full-color original drawings and photographs.

The authors describe their preferred methods for treating each injury. Bulleted key points appear at the beginning of each chapter.
