Differential Diagnosis in Orthopaedic Oncology

Presents both the radiologist's and the pathologist's approach to differential diagnosis of musculoskeletal tumors and tumor-like lesions and details the radiologic and histopathologic features helpful in confirming a diagnosis.

Illustrated with over 1,200 radiographs, CT and MR images, full-color photomicrographs, and schematic drawings. Tables list important diagnostic features, and schematic drawings summarize both radiologic and pathologic differential diagnoses.

This edition includes state-of-the-art information on PET, thin-section CT, 3-D CT, MRI, enzyme histochemistry, immunohistochemistry, flow cytometry, cytogenetics, and molecular cytogenetics. The new co-author, Gernot Jundt, was instrumental in revising the WHO classification of musculoskeletal lesions. Illustrations have been updated, and improved captions begin with the diagnosis.

Publication Year: 2006
Edition: 2nd Ed.
Author/Editor: Adam Greenspan MD, FACS; Gernot Jundt MD; Wolfgang Remagen MD
Publisher: Lippincott Williams & Wilkins (LWW)
Platform: OvidMD, Ovid
Product Type: Book
Speciality: Oncology, Orthopedics, Pathology, Radiology, Rehabilitation & Physical Medicine
Language: English
Pages: 529
Illustrations: 1283
Included In: Lippincott Williams & Wilkins Classic Book Collection 2018, Lippincott Williams & Wilkins Oncology Book Collection 2018
