Family Medicine Certification Review

Comprehensive question-and-answer review for the American Board of Family Medicine certification and recertification exams.

Questions match the content, complexity, and type of questions on the exam, and fifty clinical set problems—a major portion of the exam—are included.

This edition's questions and answers have been completely updated, e.g., questions on hypertension and lipids draw on JNC-VII and ATP-III guidelines. Numerous new tables and charts provide relevant information in a concise, convenient manner.

This book is also a valuable study aid for USMLE Step 3 and for physician assistant and nurse practitioner licensure exams.
