Pediatric Neurology: A Case-Based Review

Pediatric neurology review book written specifically for neurology residents preparing for the oral boards.

Presents sixty cases with discussions structured according to the neurology oral boards format: localization of neurologic findings; differential diagnosis and most likely diagnosis; diagnostic workup; and patient management. The cases will help readers lay a foundation of knowledge in pediatric neurology and develop an organized approach to clinical decision-making. An introduction explains in detail what to expect on the examination and gives helpful hints on preparing for and taking the exam.

Publication Year: 2006
