For more than 25 years, Dr. Dähnert's Radiology Review Manual has earned its reputation as the green "bible" for board exam preparation, in teaching situations, and in the daily practice of radiology.

A logical organization, extensive lists of image findings and differential diagnoses, an accessible outline format, and a thorough index have made this reference the #1 choice for success on the written boards. The Eighth Edition has been completely updated to provide head-to-toe coverage of the information needed for today's general radiology practice.
