This book is designed to provide a comprehensive discussion of the clinical, physical, and technical aspects of treatment planning.

With the advent of computer technology and medical imaging, treatment planning in radiation oncology has evolved from a way of devising beam arrangements to a sophisticated process whereby imaging scanners are used to define target volume, simulators are used to outline treatment volume, and computers are used to select optimal beam arrangements for treatment.

The intent of Treatment Planning in Radiation Oncology is to review clinical, physical, and technical aspects of treatment planning and present a contemporary version of the treatment planning process.

Publication Year: 2016
Edition: 4th Ed.
Author/Editor: Khan, Faiz M.; Gibbons, John P.; Sperduto, Paul W.
Publisher: Lippincott Williams & Wilkins (LWW)
Doody's Star Rating®: ★★★★★ Score: 97
Doody Core Title: Score: 3 (Medical Physics) Score: 2.73 (Radiation Oncology) Doody's Essential Title
Platform: OvidMD, Ovid
Product Type: Book
Speciality: Imaging Technology, Oncology, Radiology, Rehabilitation & Physical Medicine
Language: English
Pages: 648
Illustrations: 0
Included In: Lippincott Williams & Wilkins Doody's Core Book Collection 2018, Lippincott Williams & Wilkins Doody's Essential Book Collection 2018, Lippincott Williams & Wilkins Oncology Book Collection 2018
