A concise source of knowledge and advice, this handbook provides rapid access to relevant material with sufficient detail and explanation to make it invaluable to a trainee new to the sub-specialty or any specialist practitioner working on pediatric anesthesia.

This handbook covers all aspects of modern paediatric anaesthesia; from common ENT and general surgical day case procedures through to specialist neonatal, neurosurgical, spinal and cardiac procedures restricted to paediatric centres. "Pediatric Anesthesia" deals with individual surgical procedures on a case-by-case basis covering the whole care of a patient from preoperative assessment, through the provision of anaesthesia and pain relief, to postoperative care. There are also chapters on resuscitation, complications during anaesthesia, congenital syndromes and medical conditions which affect anaesthesia and sedation of children.

A concise source of knowledge and advice, this handbook provides rapid access to relevant material with sufficient detail and explanation to make it invaluable to a trainee new to the sub-specialty or any specialist practitioner working on pediatric anesthesia.
