This book is designed to meet the needs of the vascular trainee and can be carried in the pocket for easy access, providing practical advice on all commonly encountered peripheral vascular problems. It focuses on surgical detail, but also carries background information on presentation and details on preoperative investigation and postoperative management.

The book gives relevant information for use when seeking patient consent. Each operation carries an OPCS code, increasingly important in recording surgical activity. Alternative interventions are given, including both radiological procedures and medical management where appropriate; an important approach given the evolving vascular specialist who has responsibility in all three fields. It informs the vascular trainee from their earliest encounter with the area to those completing their fellowship. It should also be of interest to the PRHO on the vascular ward, the specialist vascular nurse, the vascular anaesthetist, the intensivist and the vascular radiologist.

Publication Year: 2007
Edition: 
Author/Editor: Hands, Linda; Ray-Chaudhuri, Simon; Sharp, Michael; Murphy
Publisher: Oxford University Press (OUP)
Doody's Star Rating*: ★★★ Score: 73
Platform: Ovid
Product Type: Book
Speciality: Cardiology, Surgery
Language: English
Pages: 504
Illustrations: 96
