Atlas of the Human Brain and Spinal Cord

The second edition of Atlas of the Human Brain and Spinal Cord offers the essentials of neuroanatomy in a newly revised format.

This atlas allows students to synthesize a three-dimensional concept of the major motor and sensory systems of the human brain and spinal cord by providing a photographic survey of the macroscopic and microscopic structure of the central nervous system. It is organized into 6 sections and covers material on gross anatomy, spinal cord, brain stem, coronal sections, axial sections, parasagittal sections, arteries and angiograms, neuroanatomical lesions, nuclear magnetic images of brain tumors, and more. The atlas plates are labeled with emphasis on major neuroanatomical structures important in clinical neurology.

In addition to the high quality plates that made the first edition a best-seller, the second edition now features:

- **Publication Year**: 2009
- **Edition**: 2nd
- **Author/Editor**: Fix, James
- **Publisher**: Jones & Bartlett Learning
- **ISBN**: 978-0-763-75318-4
- **Platform**: OvidMD, Ovid
- **Product Type**: Book
- **Speciality**: Neurology, Speech Language & Hearing
- **Language**: English
- **Pages**: 223
- **Illustrations**: 0
