Evidence-Based Practice for Nurses: Appraisal and Application of Research

Continues to serve as the definitive reference for transitioning research into nursing practice

Based on the innovation-decision process (IDP), each unit is shaped according to the five steps of the IDP: knowledge, persuasion, decision, implementation, and confirmation. This unique organizational approach combined with updated case studies and ethical principles allows the research process to be tangible and linked with strategies that promote advancement.

Publication Year 2012
