More than 400 respected luminaries explore today’s most effective strategies for managing every type of cancer by stage of presentation - discussing the role of all appropriate therapeutic modalities as well as combined-modality treatments. This multidisciplinary approach will help your cancer team collaboratively face the toughest clinical challenges and provide the best possible care for every cancer patient.

- Take full advantage of the latest advances with brand-new chapters on Hallmarks of Cancer, Molecular Methods in Cancer, Oncogenic Viruses, Cancer Screening, and new sections on Genetic testing and counseling for cancer, plus comprehensive updates throughout - including coverage of the newest biologic therapies.

- Make optimal, well-coordinated use of all appropriate therapies with balanced, multidisciplinary advice from a surgeon, a medical oncologist, and a radiation oncologist in each major treatment chapter.

- Review the latest molecular biology knowledge for each type of cancer and its implications for improved management.

Make the best decisions on cancer screening and prevention, palliative care, supportive oncology, and quality-of-life issues.
