More than 400 respected luminaries explore today’s most effective strategies for managing every type of cancer by stage of presentation - discussing the role of all appropriate therapeutic modalities as well as combined-modality treatments. This multidisciplinary approach will help your cancer team collaboratively face the toughest clinical challenges and provide the best possible care for every cancer patient.

- Take full advantage of the latest advances with brand-new chapters on Hallmarks of Cancer, Molecular Methods in Cancer, Oncogenic Viruses, Cancer Screening, and new sections on Genetic testing and counseling for cancer, plus comprehensive updates throughout - including coverage of the newest biologic therapies.
- Make optimal, well-coordinated use of all appropriate therapies with balanced, multidisciplinary advice from a surgeon, a medical oncologist, and a radiation oncologist in each major treatment chapter.
- Review the latest molecular biology knowledge for each type of cancer and its implications for improved management.
- Make the best decisions on cancer screening and prevention, palliative care, supportive oncology, and quality-of-life issues.
