A clinical reference on central nervous system infections that has been thoroughly revised from prior editions. Over 70 leading experts provide comprehensive, current information on all infections—both neural-specific and systemic—that involve the central nervous system.

Over 70 leading experts provide comprehensive, current information on all infections—both neural-specific and systemic—that involve the central nervous system. Areas with significant new clinical information include treatment of tuberculosis, non-tubercular mycobacterial infections, brain abscess, and Lyme disease.
