Thoroughly revised to reflect the latest advances in neurosurgery, radiation oncology, chemotherapy, biological therapy, and the basic sciences, the second edition of this highly acclaimed volume is the most comprehensive, current reference on tumors of the central and peripheral nervous system. Coverage includes state-of-the-art information on image-guided surgery, local delivery systems, intraoperative imaging, proton beam therapy, conformal systems, radiosurgery, new drugs and biological agents, and cell cycle deregulation and chromosomal abnormalities in tumorigenesis. More than 100 of the foremost authorities present multimodality treatment strategies for specific tumor types and examine the mechanisms of tumorigenesis.

Publication Year: 2004
Edition: 2nd Ed.
Author/Editor: Black, Peter M.; Loeffler, Jay S.
