Comprehensive Facial Rejuvenation: A Practical and Systematic Guide to Surgical Management of the Aging Face

This full-color, multimedia reference is a comprehensive "how-to" guide to the latest surgical procedures for rejuvenating the aging face. Chapters guide readers systematically through every step of preoperative evaluation, intraoperative management, surgical technique, and postoperative care and include lists of instrumentation and equipment and preoperative and postoperative patient instruction sheets. Coverage also includes practice management, adjunctive procedures, cutaneous resurfacing, basic skin care, and medical management of hair loss. The book contains 494 full-color illustrations, including step-by-step photography and large-size, computer-rendered drawings.
