Designed for quick reference in the hospital hallway or at the nurses' station, this handbook presents succinct, bulleted, up-to-the-minute information on over 300 common signs and symptoms.

It provides a rapid refresher on the key facts a nurse needs to understand: the variations, possible causes, and clinical significance of a sign or symptom.

Signs and symptoms are alphabetically organized and each is presented on an easy-to-scan two-page spread. Numerous illustrations and tables are included. Special logos highlight emergency interventions for life-threatening signs and symptoms and techniques to help pinpoint or further characterize a particular finding.
