Thoroughly updated to reflect the latest refinements in operative technique, this full-color atlas provides a surgeon’s-eye view of the anatomic structures and relationships encountered during all facial surgical procedures.

This second edition’s brand-new chapter on embryology emphasizes congenital anomalies such as clefts and dermoid cysts. New illustrations show the surgical anatomy of endoscopic approaches and recently developed procedures, including the SOOF lift. This edition also includes more detail on the osteocutaneous and retaining ligaments and the supporting ligaments and tendons of the orbit.
