Now in its fourth edition with a new editorial team, this comprehensive
text addresses all medical and public health issues involved in the care of
crews, passengers, and support personnel of aircraft and space vehicles.

Coverage includes human physiology under flight conditions, clinical medicine in
the aerospace environment, and the impact of the aviation industry on global
public health.

This edition features new chapters on radiation, toxicology and microbiology,
dental considerations in aerospace medicine, women’s health issues, commercial
human space flight, space exploration, and unique aircraft including parachuting.
Other highlights include significant new information on respiratory diseases,
cardiovascular medicine, infectious disease transmission, and human response to
acceleration.
