Problem Solving in Hypertension

With over 40 clinical presentations covering the most common yet challenging cases seen by specialists, Problem Solving in Hypertension focuses on both primary and secondary hypertension.

Problem Solving in Hypertension will appeal to a wide audience of physicians who routinely see patients with hypertension in clinical practice. This book presents a selection of challenging cases seen in everyday practice, highlighting learning points and recent developments made in the field. Each case is concise and formatted simply, logically leading the reader through clinical presentations, a series questions/learning points, pertinent background information, recent developments and further reading. Quick and easy to read, ideal for dipping in and out during busy clinical practice, Problem Solving in Hypertension is a valuable up-to-date resource for effective strategies to manage primary and secondary hypertension.
