Updated for its fourth edition, this book includes all major advances in the specialty, including malignant haematology, haemato-oncology, coagulation, transfusion medicine, and red cell disorders, with a brand new chapter on rare diseases.

Practically focused, and specifically designed for ease-of-use, and rapid access to the information you need, this handbook is an indispensable resource on all aspects of haematology for all trainee doctors, nurses, technicians, and research professionals. The handbook is divided into clinical approach and disease-specific areas. The clinical approach section outlines various symptoms and signs in patients with blood disease to enable the reader to formulate a sensible differential diagnosis before embarking on investigation and treatment. The disease-specific section is written by four authors whose expertise covers the whole breadth of diseases included in the book. All authors have contributed to national guidelines (e.g. British Committee for Standards in Haematology, BCSH) and are experts in the evidence base that exists for each topic. Key Features: A concise, clinical handbook covering the whole of haematology Reflects current practice with up-to-date investigation and management Easy-to-understand and useful for all grades of medical, nursing, technical, and research staff Includes rare disorders as well as common conditions affecting both adults and children Practically focused, written by a team of experienced, practicing clinicians.

Publication Year: 2015
Edition: 4th Ed.
