This new updated edition involves 96 contributors from around the world bringing a truly global perspective to the textbook, and highlighting both the common burdens and the differences in management from country to country.

New chapters have been included to reflect the development of old age care, covering palliative care, ethics of caring, and living and dying with dementia. Chapters have been revised and updated throughout with expanded chapters including those on brain stimulation therapies, memory clinics and services, and capacity, which has been extended to include all mental capacity and decision making.

Broad in its coverage, written by experts in their fields, and maintaining a clear structure throughout, the new second edition is the essential reference for all old age psychiatrists as well as all those interested in the mental health care of older people.

Suitable for old age psychiatrists, doctors in postgraduate psychiatry training, and other clinical professionals treating older people’s mental health.
