Evidence-based Ophthalmology

From systematic reviewing of evidence this book provides an overview of techniques for optimum management in key areas, including glaucoma, cataract and retinal disease.

Evidence-Based Ophthalmology offers a unique approach to managing eye disease and is an invaluable reference source for practitioners worldwide representing an important contribution to the literature.

Key features include:
* International authorship by leading Cochrane participants
* An unbiased method for summarising and disseminating the evidence
* Identifies gaps in evidence, and therefore research opportunities
