Evidence-based Respiratory Medicine

Compiled by specialists from the Cochrane Collaboration Airways Management Group, Evidence-based Respiratory Medicine is the first major evidence-based text in adult respiratory medicine.

Providing a comprehensive summary of the best treatments for the most important respiratory diseases, some of the world’s leading physicians review the evidence for a broad range of treatments using evidence-based principles. Essential information is presented in an easy-to-understand format, with the most important clinical implications summarized in each chapter.

Evidence-based Respiratory Medicine tackles the big clinical questions in diagnosis and treatment, presenting treatment options which take into account the individual patient’s needs.
