Memory and Emotion: Interdisciplinary Perspectives is a collection of original articles that explores cutting-edge research in memory and emotion, discussing findings, methodological techniques, and theoretical advances in one of the fastest-growing areas in psychology.

Memory and Emotion:
- contains contributions by leading researchers in the field
- emphasizes cognitive neuroscience, psychopathology, and aging in covering contemporary advances in research on memory and emotion
- covers many of the current hot topics in the field including: dissociative amnesia and post-traumatic stress disorder; false, recovered and traumatic memories; flashbulb memories; the use of emotional memories in therapy; and the influence of emotion on autobiographical memory.
