Manual of Clinical Oncology

An indispensable resource for understanding basic science, clinical findings, and available technology as they relate to the diagnosis and management of patients with cancer.

The practical format provides high-yield content useful for participating in rounds and making diagnostic and therapeutic decisions at the bedside. Edited by Dr. Bartosz Chmielowski and Dr. Mary Territo, both from UCLA School of Medicine, this eighth edition carries on the tradition of excellence set forth by longtime editor Dr. Dennis Casciato.

Key features:
- Incorporates recent major achievements in immunotherapies, biologics, and targeted therapies.
- Features new chapters on the biology of cancer, immunotherapy, and cancer survivorship.
- Contains numerous diagnostic and treatment algorithms, as well as content on complications, for assistance with clinical decision-making.
- Includes helpful appendices such as a glossary of cytogenetic nomenclature and combination chemotherapy regimens.
