The second edition of this acclaimed ANP review continues to promote efficient, time-saving study by synthesizing the key content needed to pass the NP Certification Exam into a concise, well-organized format.

Using test-taking strategies meticulously developed by the author, the Review provides unique "question dissection techniques," targeted key content review, 600 extensive practice questions, and detailed, current exam information in a fast facts style. This second edition includes an extensive new section on geriatrics that encompasses body/metabolic changes, common disorders, and hospice/ethical considerations. The book also presents an expanded, intensive pharmacology review, 100 new exam questions, and is the only review to offer a new research chapter providing elements of research needed for E-B practice.

The book reviews the complete adult lifespan from adolescence on, and covers non-clinical content including ethics, medico-legal issues, advanced practice law, and reimbursement guidelines. The review of primary care disorders is organized by body system. The content is applicable for certification exams for both the ANCC and the AANP.

New to this edition:
- Reorganized for greater ease of use
- Provides extensive new section on geriatrics covering body/metabolic changes, common disorders, and hospice/ethical considerations
- Contains expanded intensive-style pharmacology review
- Presents elements of research needed for E-B practice
- Includes 100 new questions for a total of 600 'high-yield' questions
