Annual Review of Nursing Education, Volume 4, 2006: Innovations in Curriculum, Teaching, and Student and Faculty Development

Volume 4 covers trends and innovative strategies to help educators develop a curriculum and be more effective in using it.

In this volume educators describe problems—such as students who cannot write or high NCLEX failure rates—and how they tackled and solved them. Each chapter contains common sense approaches to every educator’s questions. A resource no nursing education program can afford to be without.
