Family Nurse Practitioner Certification Intensive Review: Fast Facts and Practice Questions

The third edition of this highly acclaimed review continues to promote efficient, time-saving study by synthesizing the complex knowledge needed to pass the exam into a concise, well-organized format.

It is updated with key information about the new ANCC and AANPCB certification exams, including new test format questions featuring photos of skin and eye conditions and EKGs, and more challenging drag and-drop and multiple-choice questions. Also new to the third edition is more detailed information about nonclinical topics on the exam, including research, ethics, medico-legal issues, advanced practice law, health practices of major cultures, and reimbursement guidelines.

Designed to help FNP students boost their confidence through intensive review and high-quality questions, the third edition features succinct, precisely targeted “need-to-know” details of diseases commonly seen in primary care. It covers the entire life span from pediatrics through geriatrics, and offers extensive test-taking techniques and question dissection and analysis sections that provide strategies for identifying the best clues during the problem-solving process. Organized by body system, sections are consistently formatted and encompass Danger Signals, Normal Findings, Lab Findings, Benign Variants, and individual Disease Review topics for each system. Additional outstanding features include Exam Tips and Clinical Pearls that help to focus system study on key information.

New to this edition:
- Updated information reflecting the new FNP certification exam
- New test format questions used by the AANC, including photos of skin and eye conditions, EKGs, and more complex drag-and-drop and multiple-choice questions
- 100 new in-depth review questions for a total of more than 700
- Differential Diagnosis in table format
- Presents elements of research needed for E-B practice
- Additional information about nonclinical topics including culture, spirituality, and health practices; evidence-based medicine; and more
